

May 31, 1954

Dear Dr. Iseki:

I wish to note with my thanks your cordial sending of reprints of papers by your colleagues and yourself on Salmonella variation.

Unfortunately, I have to report that shortly after receipt the group of papers received sometime during the last few months has disappeared from my files, and I have not been able to find them despite the most thorough search.

I would deem it a special favor if you could replace this loss, as well as to continue the regular exchange of publications of mutual interest. For your record, the papers I do have in my file from your department are:

- 1) Artificial transformation of O antigens in Salmonella E group:
papers I and II only (Trans. Jap. Acad. #30, 31)
- 2) On V loss variants: # 86, 102
- 3) From the ~~same~~ journal also: # 85, 100, 101, 39, 50, 103
- 4) From Gunman Jour. Med. Sci., 1:1-21; 219-222.

You can be sure I have been following this work with the deepest interest.

Yours sincerely,

Joshua Lederberg
Associate Professor of Genetics
